Happy Saturday, Dr. Hahn! CDER made a few edits to your quote in the regeneron release. Does this work for you?

"The FDA remains committed to advancing the nation's public health during this unprecedented pandemic. Authorizing these monoclonal antibody therapies may help outpatients avoid hospitalization and alleviate the burden on our health care system," said FDA Commissioner Stephen M. Hahn, M.D. "As part of our Coronavirus Treatment Acceleration Program, the FDA uses every possible pathway to make new treatments available to patients as quickly as possible while continuing to study the safety and effectiveness of these treatments."

Did Regeneron use aborted fetal cells to make the monoclonal antibodies that Trump received?
No. Although the monoclonal antibodies infused into Trump were not made from or in fetal cells, Regeneron did develop that treatment with the help of a long-lived line of cells established from the kidneys of a fetus electively aborted in the Netherlands around 1972. The company relied on those widely used cells, known HEK-293 cells, to make mimics of the coronavirus spike protein. Researchers used these proteins to test the potency of antibodies found in COVID-19 patients or made in mice with a humanlike immune system (see initial question). The antibodies selected for the company's cocktail, however, were then mass produced in nonfetal cells. The creation of the humanized mice also did not rely on HEK-293 cells or other cells from aborted fetuses or human embryos. Regeneron scientists detail their methods in the supplementary material to this paper published in Science in August.

Haven't bugged you in a while. Thought you might find this article interesting. It seems we've put most (all) of our emphasis on late stage therapeutics and vaccines. Have we done any significant work on early treatment? As you know, I get a lot of information from advocates of HCQ and other early treatment options. Seems like evidence is growing that some of these are showing results around the world.

My staff heard that FDA might be preparing an approval on early COVID treatment. If true, it would helpful to know what to expect. We are in the process of designing and scheduling a hearing on that exact subject.

Dr Hahn. This is Brian Rudick with Honeywell. John Waldron asked me to reach out to you after he just finished a call with WH CoS who asked what needs to be done for us to be able to ship (b)(4) masks today. I've had calls yesterday with FDA and HHS. I wanted to bring you up to speed and solicit your guidance on how best to try to solve this.

I know you are super busy but Would appreciate if you could call me back to discuss for a few min. Many thanks. -Brian

Just finished meeting with FDA team on the other two combinations going through Appendix A. We also discussed (b)(4) label issue. From a priority standpoint, allowing us to ship (b)(4) masks under a waiver is more impactful than getting Appendix A inclusion for other two combos in short term. We obviously need both but wanted you to get a sense of priority from us.

When you come up for air... we spoke with (b)(4) who has provided us with the 25 gsm spunbond that your team is asking about. We just had the GM of (b)(4) send a statement to your team confirming that they supply same material to (b)(4) other Leading face mask manufactures with 510k cleared products. Hoping this is enough for the (b)(4) formulation. We have a second formulation with Superior material and doesn't sound like there are any questions there so maybe that's easier to do now?

I can give you more detail when we speak but I think it's largely consistent with my prior text last night. The only other bit of information that I can share is that your team spoke with somebody at (b)(4) after (b)(4) submitted the additional information. I'm hoping that's all that was needed for that combination. Not aware of any issues on the second combination involving superior. We have (b)(4) mass involving that combination ready to ship upon appendix a approval.

Specifically here's what we said:

That said, if your team feels that Appendix A listing for Combination 3 (b)(4) is not possible today and that Combination 2 (b)(4) can be listed on Appendix A today, then we would request FDA to: (a) list Combination 2 (b)(4) on the EUA Appendix A; (b) exercise its enforcement discretion to not object to the use and distribution of Combination 2 (b)(4) in its existing packaging/labeling while working on Combination 3 (b)(4)

So nice of you to do that. Thank you! Needless to say I also sang your praises and emphasized that I think we chatted about 20X in 3 days. I've never seen that type of personal engagement and leadership from anyone in a senior position like you hold. I think we are up to (b)(4) masks leaving on Monday (b)(4)

Dr Hahn - Brian Rudick let me know that you worked super hard and partnered tremendously well getting things cleared up so masks can begin shipping to those who need them most. You and the FDA are doing critically important things in this extremely challenging time. Your personal approach and commitment makes a big difference. Thanks again and Happy Holidays!

Dr. Hahn - this is Darius Adamczyk - CEO of Honeywell. Just wanted to say thank you for your personal assistance and the hard work of your staff in resolving our surgical mask matter so quickly this week. We hope this helps get these critical supplies to those most in need. We are very grateful for FDA's leadership during the pandemic. Happy Holidays
Darius

Hello Dr. Hahn.

Just wanted to send you a note thanking you for your service.

When my former company (Outdoor Research) first worked our way through FDA's ever changing and frustrating regulations I appreciated you were in an unenviable position. However you were always a straight broker regardless of the political implications. I am now working with FLTR Inc, the largest supplier of PPE to (b)(4). More FDA regulations in my future as we move from masks, thermometers, and N95s to (b)(4) under our brand as the specification developer. I hope your successor has calmer waters to sail!

I can only wish you and your family all the best in the future! Perhaps some rest in recovery from this ridiculously turbulent year!

Jason Duncan

Hi Commissioner- just flagging for you that you have a call with Senator Merkley at 6:35 tonight to discuss the NYTS and PMTA application deadline. We gave your TPs to Frank and Jakea.

Merkley's staff told me he also intends to bring up vaccines. His staff sent over some questions earlier today with some status requests and how we will be moving forward (we are working on those) but I think he also intends to press you a bit on it as far as following science and data.

A Warren signature issue is ethics. She introduced a bill to root out conflicts on interest in COVID funding. She'll ask each of you if you have COI. She may also ask what protections in place to prevent.

(b)(5)

If asked:
